

# End-of-Year Savings

Maximise Performance with Exclusive Discounts on Reordering Prodieco's Spare Parts and Reworks. Limited Time Only!

Dear Valued Customer,

As we approach the end of the year, Prodieco is here to help you maintain the precision, efficiency, and reliability of your blister packaging lines. Our premium-quality spare parts and rework services are designed to keep your operations running at peak performance.

Take advantage of our End-of-Year Sale with a **20% discount** on reordering components previously designed by Prodieco. This offer is valid on all orders quoted and confirmed before **30 November**.

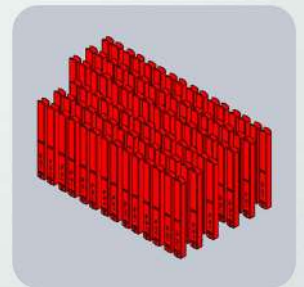

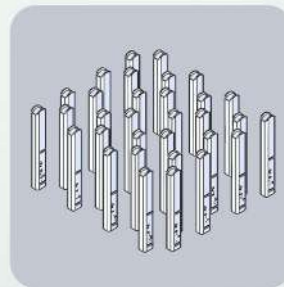

---

## Exclusive Savings on Essential Spare Parts Previously Designed by Prodieco

This limited-time offer includes vital components designed to maintain precision and efficiency in your blister packaging operations. By investing in these high-quality parts, you can reduce downtime and extend the lifespan of your equipment. See the list of components included in this offer below:

### 1. Simtap Tubes

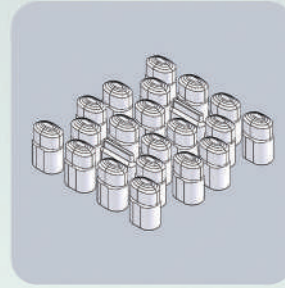

Ensure consistent product feeding with high-durability tubes that reduce blockages and improve operational flow.

# Exclusive Savings on Essential Spare Parts Previously Designed by Prodieco

## 2. Form Pins

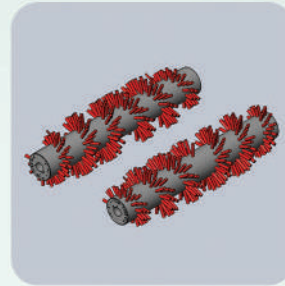

Precision-engineered to maintain optimal blister formation and ensure consistent, high-quality packaging.

## 3. Brushes

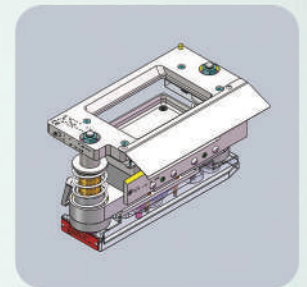

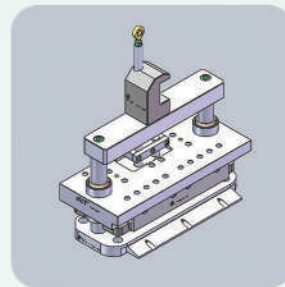

Web Cleaning & Brush Box

Keep your equipment running smoothly by effectively removing dust and debris, preventing production interruptions.

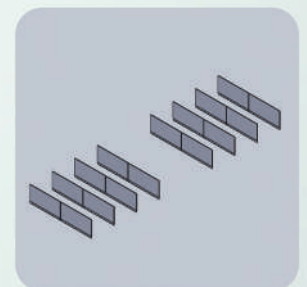

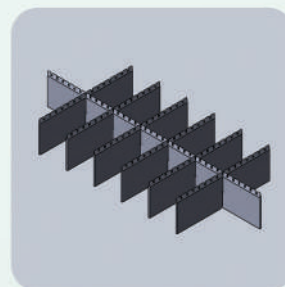

## 4. Punch Tools/Regrinds

Extend the life of your tooling with sharp, precise punches, ensuring accurate cuts and optimised performance.

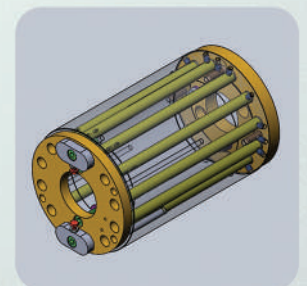

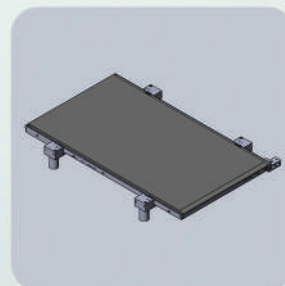

## 5. Perforation Blades

Maintain sharpness for clean, accurate perforations, reducing waste and improving efficiency in the packaging process.

## 6. Heating Plates/Rollers

Designed for optimal heat transfer, ensuring even material distribution and consistent forming quality.

## The Benefits of Choosing Prodieco Spare Parts

- **Prolong Machine Life:** Replace worn parts to maintain machine efficiency and reduce downtime.
- **Optimise Production:** High-quality regrinds and punch tools for sharper, more precise results.
- **Cost Savings:** Maximise the lifespan of your tooling with our precision-engineered parts.
- **Expert Support:** Dedicated technical support to ensure seamless integration of spare parts into your existing systems.
